

Cecil Cao . Jarvis Consulting

I am a Project Manager at Jarvis, focused on delivering clear insights and actionable solutions to clients. I drive progress using Agile methodologies, and I am most proud of my organizational skills and attentiveness to my team's needs and abilities. I have proven experience working as a programming lead in research projects and RA positions investigating new technologies, with a CS background at the University of Toronto. With 3+ years of professional development, I frequently manage and organize projects, while keeping stakeholders and product goals consistent and achievable. I am always learning and proactively seek to support my teams, and use my experiences as a developer to set realistic goals.

Skills

Proficient: Agile Methodology, Trello, Stakeholder Management, Project/Task Scheduling, Git, C#, Java, Python, Linux/Bash, Typescript

Competent: Risk Assessment, C++, RDBMS/SQL, AWS Cloud Computing, Docker, OpenXR

Familiar: Notion, Jira, GraphQL, Golang, Blender, IsaacSim/IsaacLab, Waterfall

Jarvis Projects

Project source code: https://github.com/jarviscanada/jarvis_data_eng_CecilCao

Cluster Monitor [GitHub]: Coordinated Docker setup and Bash scripting tasks across the team. Tracked progress using a simple Kanban board to ensure on-time delivery. Documented key security risks of the current architecture for future development.

Python Data Analytics [GitHub]: Analyzed a sanitized dataset from the London Gift Shop with PostgreSQL and Jupyter, and presented insights on their types of customers, as well as their geographic outreach to increase revenue growth.

BSA Fundamentals [GitHub]: Drafted a software requirement document outlining the hardware, software, and development constraints and 8-month scope to develop a robust market order trading app for the Bank of Jarvis' online service products.

BSA Elicitation Project [GitHub]: Presented a business solution to a managing director and the team for an automated dashboard in order to minimize human error during the document drafting process. Drafted a business requirements document to outline the requirements, constraints, and timeline by an elicitation with the managing director, as well as, the rest of the team for clarification on requirements and to manage the needs of everyone on the team.

Highlighted Projects

Into the Dataswarm (Beta) [GitHub]: Managed the Trello kanban board and Git repository, ran weekly Agile sprints to break down key milestones into actionable tickets, prioritized bug fixes and feature tickets each sprint. Consulted with playtesters and the game's creative director in order to realize and refine stakeholder goals.

Toronto Job Market Database: Discovered COVID-19's impact on the Toronto job market using the open datasets and determined job sectors affected most by the pandemic. Utilized Python (Pandas and Pyplot) to set up an ETL pipeline onto a PSQL database.

Professional Experiences

Project Manager, Jarvis (2026-present): Working with key executives and stakeholders to manage sprints by keeping tasks organized in Notion. Writing validation scripts in Python to support the team's workflow. Providing updates and resolving daily blockers to maintain steady progress.

Research Assistant, University of Toronto (2025-present): Managing a Trello board and broke down the stakeholders' goals into its key components to achieve MVP. Communicating with the primary stakeholder on a monthly basis to align project milestones with stakeholder goals.

Junior Software Engineer, Alida Inc. (2022-2023): Organized Agile sprint retros with Jira to identify key blockers, and tracked work progress on a burn-down chart. Implemented a full-stack website with React, Typescript, Golang and PSQL.

Education

University of Toronto (2018-2025), Bachelor of Computer Science, Arts and Science

Miscellaneous

- Hosts creative writing sessions among peers and writes flash fiction pieces for Role-playing Games.
- An active member of the International Game Developers Association, and developing an indie game.
- Tutors language arts and mathematics to K12 students on the weekends.
